Overall Program

	Strongly Disagree		Disagree		Agree	Strongly Agree
1. The activity met the stated objectives in such a way that I am better able to:						
a. Identify the patient populations that are most appropriate for each IUD.	1	2	3	4	5	6
b. Characterize the mechanisms of action for each IUD.	1	2	3	4	5	6

2. Overall, the activity was presented in a fair-balanced manner. ☐ Yes ☐ No*
***** If you checked "No," please explain. _____

3. Overall, the activity was free of commercial bias. ☐ Yes ☐ No*
***** If you checked "No," please explain. _____

4. In reflecting on your practice, what type of impact will this educational activity have?
I will:
☐ Be better able to recommend an IUD for my patients based on the WHO eligibility criteria.
☐ Be better able to summarize studies that suggest no increase in infertility risk after IUD use by nulliparous women.
☐ Other: _____

5. What topics should be dealt with in more detail? (*List topics.*)
_____ _____
_____ _____

POSTTEST QUESTIONS (please circle correct answers; see the directions on this page)

*A summary of posttest results will be available effective April 30, 2007, on **www.ppscme.org/womenshealth**.*
The summary will be updated on a quarterly basis to reflect all responses received.

Question 1. Failure rates for the LNG IUS and the copper T 380A IUD range from 0.1% to 0.8% per year.
A. True **B.** False

Question 2. IUD use increases the risk for infertility.
A. True **B.** False

Question 3. Which IUD can be used in women with breast cancer?
A. The copper T 380A **C.** Both the copper T 380A and the LNG IUS
B. The LNG IUS **D.** Neither the copper T 380A nor the LNG IUS

Question 4. The WHO medical eligibility criteria recommend that the hormonal and non-hormonal IUDs should not be used in women with obesity (BMI ≥30 kg/m^2).
A. True **B.** False

Thank you for your participation.
